MEMORANDUM FOR THE RECORD

SUBJECT: RAND Corporation

1. [] called to say that George Carey and other Agency representatives have requested the RAND Corporation to do a research job for OO -- probably FBID. The Air Force has agreed to do the job at no cost to the Agency.

2. Initially, four persons will be asked to deal with Agency classified materials: []
[] Three others might later become involved, according to [] in which event they would have to be cleared by the Agency. These three are on the list of 46 that CIA is checking in connection with the [] project.

3. George Carey informs me that it probably will not be necessary for the three people as yet unchecked to have access to Agency classified materials. Rather, [] will deal with the materials and, as necessary, will pose hypothetical problems based on the materials to the other three persons. Should clearance be required for these three, Carey agreed to let me know so that we could arrange to put them close to the top of the list of 46.
